### TEST REPORT

| Test Name                          | Result | Ref Range           | Unit         |
|------------------------------------|--------|---------------------|--------------|
| Haematology                        |        |                     |              |
| <b>Complete Blood Count</b>        |        |                     |              |
| Haemoglobin (HB)                   | 15     | Male : 13.5 to 16.5 | gms/dl       |
| Total Leukocyte Count              | 5500   | 4000 to 11000       | cumm         |
| <b>Differential Count (DC)</b>     |        |                     |              |
| Neutrophils                        | 45     | Male : 40 to 75     | %            |
| Lymphocytes                        | 22     | Male : 20 to 45     | %            |
| Eosinophils                        | 5      | Male : 01 to 06     | %            |
| Monocytes                          | 5      | Male : 01 to 10     | %            |
| Basophils                          | 1      | 00 to 01            | %            |
| Platelet Counts (PC)               | 3      | 1.5 to 4.5          | lakhs/cumm   |
| Total RBC Count                    | 5      | Male : 4.5 to 5.5   | million/cumm |
| Packed cell volume (PCV)           | 50     | Male : 45 to 55     | %            |
| White Blood cell count (WBC)       | 5500   | 4000 to 11000       | Cells/cumm   |
| Mean Corpuscular Volume (MCV)      | 90     | 78 to 98            | fL           |
| Mean Corpuscular Haemoglobin (MCH) | 30     | 27 to 32            | pg           |
| MCH Concentration (MCHC)           | 32     | 31 to 36            | g/dl         |
| Mean Platlet Volume (MPV)          | 7.2    | 6.5 to 12           | fL           |
